

Information sheet IV (for certified traders) **Generally required identification elements on accompanying documents of products from organic production**

Introductory statement: The “term labelling is defined in the EU Organic Regulation”¹ and thus the scope for the required information is defined.

The following general labelling elements must be included on the **accompanying documents** for products from organic production (delivery notes, invoices, ...) for **traders**:

Labelling with the code number of the control body of the trader

The code number for the responsible organic inspection body that certifies the trading company shall also appear on the documents accompanying the goods.

In terms of content, this should be done with a reference to the control/certification of the trading activity. For example, the standard text (e.g. in the footer) with a reference to the organic control body for the trading activity (content) can be stated on the documents accompanying the goods:

e.g.: **Control body for our trading activities: AT-BIO-301**

or: **Our trading activity is certified by: AT-BIO-301**

Labelling of „organic food“² (incl. processed feed³ and other organic products⁴)

In the case of "organic foods"² (and the other included organic products) the commercial product designation should be accompanied by the term **organic** (and their derivatives and diminutives, such as 'bio' and 'eco'). For better understanding, the written **reference to organic production** can be added

e.g.: **organic apple/carrot juice**

or: **apple/carrot juice from organic production**

Labelling “<95% products“⁵

In the case of "<95% products"⁵ only the corresponding **XX% organic ingredients** (or at least as **<95% product**) that correspond to the product should be added.

e.g.: **Compound with XX% organic ingredients**

Labelling of in-conversion products⁶ (products produced during the conversion period⁶)

In the case of in-conversion products³, the reference **in-conversion product** or **product from conversion to organic production** should be added to the commercial product designation. These products must not bear an organic label! It can only be a mono-product.

e.g.: **Wheat - in-conversion product**

¹according to Regulation (EU) 2018/848 current version, Chapter I, Article 3, (52)

²according to Regulation (EU) 2018/848 current version, Chapter IV, Article 30, (5), a)

³according to Regulation (EU) 2018/848 current version, Chapter IV, Article 30, (6)

⁴according to Regulation (EU) 2018/848 current version, Chapter I, Article 3, (2)

⁵ according to Regulation (EU) 2018/848 current version, Chapter IV, Article 30, (5), b)

⁶ according to Regulation (EU) 2018/848 current version, Article 10
